

This cross-sectional view shows a grid-like structure of alternating layers. The top layer is labeled 270. Below it is a layer 230, which contains a grid of rectangular features. The vertical walls of these features are labeled 290. The horizontal layers within the grid are labeled 320. The bottom horizontal layer of the grid is labeled 330. Below the grid is a layer 210, which has a curved bottom surface. The entire structure is on a substrate 200. A dimension line 205 indicates the width of the grid, and a dimension line 201 indicates the width of one of the rectangular features.
